

HEAVY DUTY PAIL WRENCHES

Chemical manufacturers are required by law to provide 70 inch-lbs. of torque to a 70 mm 5 gallon pail cap. This makes them difficult to open with a channel lock pliers or a hammer and a screw driver. Both of the Heavy Duty Pail Wrenches make opening pails a quick and easy task. They also make closing the pail securely very easy so chemical spills can be eliminated. Please contact your local JSA technical sales & service representative for more information, product demonstrations and availability. Thank you.

» Features & Benefits
