

Solvent Recycling Parts Washer

» AXAREL® 1000 Aerospace Approved High-Purity Solvent Cleaner

Advantages

- Low to no odor
- Safe for all ferrous and non-ferrous metals - as well as some plastics
- Fast dry times
- Removes a wide range of greases, oils, coolants, lubricants, etc.
- Excellent replacement for MEK, Acetone, IPA and other low flashpoint solvents
- Non-corrosive; low vapor pressure

Environmental/Regulatory

- ZERO - Ozone Depleting Potential (ODP)
- NO - Hazardous Air Pollutants (HAP)
- NESHAP - Not Regulated
- SARA - Not Regulated

Approvals

- MIL-PRF-680 Type 1
- Airbus
- Boeing
- Honeywell Aerospace
- Lockheed Martin
- Pratt & Whitney

AXAREL® is a registered trademark of Petroferm, Inc. a Vantage Specialty Chemical Business

After extensive research and customer input, Clarus Technologies developed a parts cleaning station that is unparalleled in industry. Using solvent filtration and a cone bottom baffle design, contaminants settle to the bottom and clean filtered solvent is circulated to the brush. Solvent usage is greatly reduced and production greatly increased. With over 1000 units in operation at Military bases across the US, this proven technology can benefit metal finishing and metal working facilities throughout the Midwest. Please contact your local JSA technical sales & service representative for more detailed information.

» Features & Benefits

- PCS-25 Dimensions: 44" H x 51" W x 31" Deep (smaller base model available upon request)
- Designed for use with AXAREL® 1000
- Powder coated high quality steel construction - 12 and 14 gauge steel
- Bright stainless steel work surface
- Dual canister high capacity filtration; 0.5 micron
- Constant flow and consistently clean solvent
- Patent pending sump design for efficient sludge removal
- Fluid level gauge with indicator
- Pressure gauge shows status of filters
- Built-in automatic shut-off after 4 minutes
- Limited Lifetime Warranty
