

EnviroWedge™ - Drum Assistant

Even with the best drum pump, it is difficult to remove the last few gallons of chemistry from a drum that sits flat on the shop floor. The EnviroWedge™ is an inexpensive tool that can be easily slid under the drum to push the remaining chemistry to the pumping location. The EnviroWedge™ will reduce chemical spills and the hazards associated with picking up or tipping a drum to pour out the remainder of the chemistry. Please contact your local JSA technical sales & service representative for more information, product demonstrations and availability.

» Features & Benefits

No More Wasted Chemistry

- Place the EnviroWedge™ under the drum at the opposite end of the opening so the remaining chemistry flows directly under the drum pump

Environmentally Friendly

- Manufactured from 100% recycled polyethylene
